

# Paper I — Internal-consistency tests

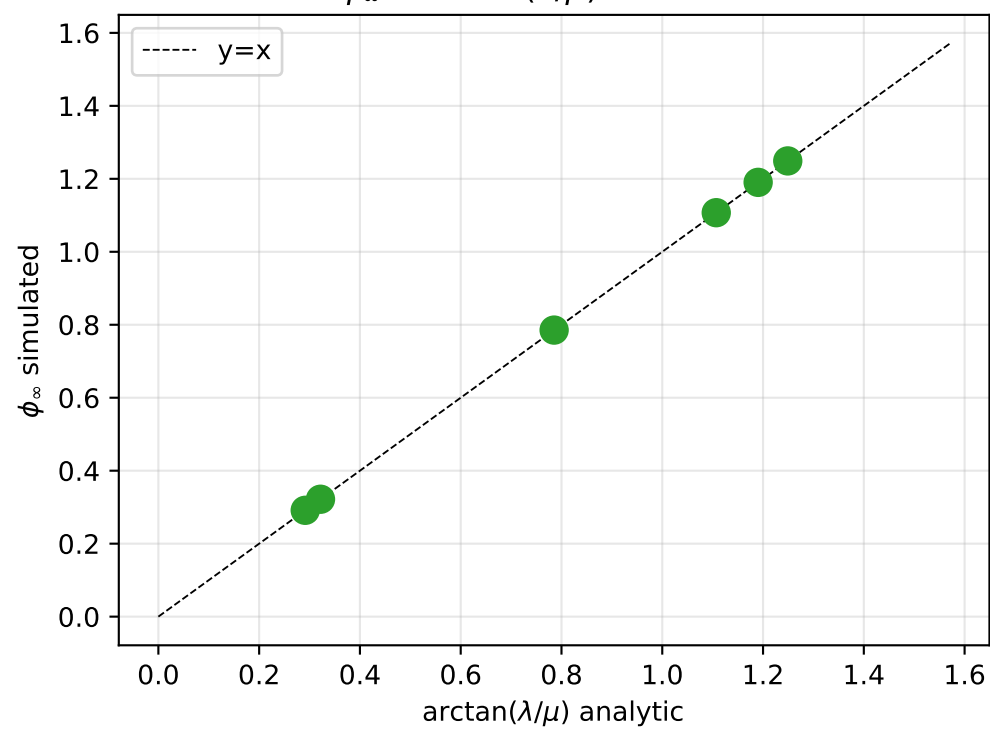

Test 1: Conservation  
flux zero-sum:  $\leq 1e-17$ , clip  $\sim$  structural

Test 2: Identity  $T^2 + I^2 = \chi$  preserved under drainage

Test 4: Inertial relaxation  
 $\phi_\infty = \arctan(\lambda/\mu)$  to  $\sim 10^{-6}$

Test 5: SR recovered at chi=1 (identity)
